PORTAVAC PV300D

Technical Specifications

The Screenpod PV300D is a compact, yet powerful self-contained industrial vacuum with a vast range of attachments, that's fully mobile and capable of handling a huge variety of different materials in sizes ranging from fine dust to large debris, in both indoor and outdoor applications, with its own high capacity, integrated skip for material collection that's easily emptied via the use of a forklift.

Features:

- Can handle huge variety of different materials in vast range of applications
- Dual power, with option to run from either onboard genset or external supply
- 18.4kW (25 HP) EU Stage V / EPA Tier 4 Final Caterpillar Engine
- 110 litre fuel tank with easily accessible fuel filler cap and level gauge
- Fuel efficient diesel engine with no after treatment and no AdBlue required
- Integrated plug for connection to standard 32 Amp 3-Phase Power Supply
- Powerful blower fan providing long range suction with high capacity
- Can vacuum material ranging from fine dust up to debris 40mm in size
- Integrated skip with large capacity for material collection
- Skip has built-in tipping mechanism for easy material discharge
- Raise/Lower mechanism for effortless skip removal and installation
- User friendly interface for simple operation & emergency stop for shut down
- Air filtration system that removes 99.7% of airborne particulate matter
- Easily replaceable Bag & HEPA filter elements
- Wide range of attachments with different hose sizes available
- Long, flexible hoses provide reach for hard to access areas
- Low operating costs with minimal maintenance requirements
- Compact footprint with low noise emissions that's easily transported
- Access doors and removable panels for service access
- Suitable for indoor and outdoor applications
