PORTAVAC PV300E

Technical Specifications

The Screenpod PV300E is a compact, yet powerful self-contained industrial vacuum with a vast range of attachments, that's fully mobile and capable of handling a huge variety of different materials in sizes ranging from fine dust to large debris, in both indoor and outdoor applications, with its own high capacity, integrated skip for material collection that's easily emptied via the use of a forklift.

Features:

- Can handle huge variety of different materials in vast range of applications
- Powerful blower fan providing long range suction with high capacity
- Can vacuum material ranging from fine dust up to debris 40mm in size
- Integrated skip with large capacity for material collection
- Skip has built-in tipping mechanism for easy material discharge
- Removable hood with integrated fork pockets
- User friendly interface for straightforward operation
- Air filtration system that removes 99.7% of airborne particulate matter
- Easily replaceable Bag & HEPA filter elements
- Integrated plug for connection to standard 32 Amp 3-Phase Power Supply
- Wide range of attachments with different hose sizes available
- Long, flexible hoses provide reach for hard to access areas
- Low operating costs with minimal maintenance requirements
- Compact footprint with low noise emissions that's easily transported
- Access doors and removable panels for service access
- Emergency stop for shut down
- Robust steel construction with highly durable coating
- Suitable for indoor and outdoor applications
